

Google Earth Images of French Polynesia

*****Use at your own risk. These GE chartlets are not a substitute for proper navigation.*****

>> Good fast internet is required to download these GE images<<<

We have removed our 1400 .kap charts that have served us for so many years and now pointing to SV Migrations Chart Locker. The mb tiles are far better than the older kap charts.

GOOGLE EARTH IMAGES FOR FRENCH POLYNESIA by SV Migration

Additional Google Earth Images called "MBTiles" that cover all of French Polynesia were created by Bruce on Migration. They have been made available for download and used in OpenCPN.

Charts are available here > <http://brucebalan.com/chartlocker/>

Charts based on Navionics, Google Satellite, and Bing Satellite are now available for all of French Polynesia, the Pitcairn Islands, and Rapa Nui.

Additional information is available including the exact size of each zip file -- this can help in case of download errors. The notes section gives more information about each file and the "HOW TO USE THESE FILES" section has been updated.

Big thank you to Bruce on SV Migration - buy them a beer!
